

rozšířit možnosti péče o pacienty s diabetem a jeho komplikacemi, vede k přesvědčivému zlepšení kompenzace diabetu a ke zlepšení selfmonitoringu pacientů s diabetem. Pozitivní účinek telemedicíny závisí na správném nastavení procesů přenosu a zpracování dat, ale také na edukaci všech zúčastněných. Telemedicína podporuje zapo-

jení pacientů, ale i dalších zdravotníků do managementu diabetu, zlepšuje koordinaci péče a zefektivňuje komunikaci mezi pacienty a zdravotníky.

Podpořeno MZ ČR – RVO („Institut klinické a experimentální medicíny – IKEM, IČ 00023001“).
